

-THE FUTURE OF NORDIC UTILITIES SERIES- DIGITAL WATER SOLUTIONS II

MARCH 8TH 13.00-14.30

The use of digital solutions and technologies has the potential to revolutionize business operations and processes in water sector as it has done across countless industries in the recent years.

With novel sensors, sophisticated data analysis and modelling digitalization enables intricate process control are being implemented to increase treatment efficiency and increase the energy yields.

The Trade Council in Stockholm and Climate Adaptation Living Lab Copenhagen welcomes you to the first in the series 'The future of Nordic solutions' to discuss digitalization of the waste water sector.

Speakers:

Magnus Arnell, RISE

Dennis Wanninger & Henrik Refstrup Sørensen, DHI

Dines Thornberg, Biofos

More to come

**WE ARE LOOKING FORWARD TO YOUR
PARTICIPATION!**
